

# Amarr and LEED®

LEED®<sup>1</sup> (Leadership in Energy and Environmental Design) is a voluntary, consensus-based, rating system for developing high-performance, sustainable buildings, developed by The U.S. Green Building Council (USGBC).

Amarr Steel Sectional Door products positively contribute to the following LEED® Credits for Green Building Design & Construction:

### Materials & Resources, Credit 2.1 and 2.2 Construction Waste Management

Over 95% of our product components are recyclable; therefore, scrap produced during construction can be diverted from landfills through use of a construction waste management plan.

### Materials and Resources Credit 4.1 and 4.2: Recycled Content Percentage

*Requirements:*

Use materials with recycled content such that the sum of postconsumer recycled content plus 1/2 of the preconsumer content constitutes at least 10% or 20%, based on cost, of the total value of the materials in the project.

The minimum percentage materials recycled for each point threshold is as follows:

Recycled Content	Points
10%	1
20%	2

Amarr steel sectional door products are positive net contributors to Materials & Resources Credits 4.1 & 4.2 10% and 20% recycled goals. Content percentages are listed below.

Amarr Commercial Model	Recycled Content %	Pre-Consumer	Post-Consumer
2042, 2741, 2742, 2743, 2747, 3040	58%	32%	42%
2432, 2732, 2731	58%	31%	42%
2002/2012/2022, 2402/2412/2422, 2502/2512/2522	35%	11%	29%

### Materials and Resources Credit 5.1 and 5.2: Regional Materials

Manufacturer Locations:

- 3800 Greenway Circle, Lawrence, KS 66046

<sup>2</sup>Percentages are based on information received from our vendors and have been represented to Amarr as true and accurate.
